CONTENTS

Curvature and rank of Teichmüller space. By JEFFREY BROCK and BENSON FARB ............................................. 1
Homology over local homomorphisms. By LUCHEZAR L. AVRAMOV, SRIKANTH IYENGAR, and CLAUDIA MILLER ............................................. 23
The disc as a bilinear multiplier. By LOUKAS GRAFAKOS and XIAOCHUN LI 91
Singularities of Schubert varieties, tangent cones and Bruhat graphs. By JAMES B. CARRELL and JOCHEN KUTTLER ............................................. 121
Proof of R. Salvati Manni and J. Top's conjectures on Siegel modular forms and Abelian surfaces. By TAKEO OKAZAKI ............................................. 139
Group-valued implosion and parabolic structures. By JACQUES HURTUBISE, LISA JEFFREY, and REYER SJAMAAR ............................................. 167
Differentiability of the stable norm in codimension one. By FRANZ AUER and VICTOR BANGERT ............................................. 215
Holomorphic flexibility properties of complex manifolds. By FRANC FORSTNERIC ............................................. 239
