CONTENTS

S. Keraani
Semiclassical limit for nonlinear Schrödinger equation with potential. II 171

S. Ōuchi
Multisummability of formal power series solutions of nonlinear partial differential equations in complex domains 187

K. Santugini-Repiquet
Modelization of a split in a ferromagnetic body by an equivalent boundary condition: Part I. The classical case: No surface energies present 227

K. Santugini-Repiquet
Modelization of a split in a ferromagnetic body by an equivalent boundary condition: Part II. The influence of super-exchange and surface anisotropy 261

A. Boutet de Monvel, S. Naboko and L.O. Silva
The asymptotic behavior of eigenvalues of a modified Jaynes-Cummings model 291

L. Scardia
The nonlinear bending-torsion theory for curved rods as $\Gamma$-limit of three-dimensional elasticity 317
