CONTENTS

P. Clement, M. Garcia-Huidobro, I. Guerra and R. Mana'sevich
On regions of existence and nonexistence of solutions for a system of $p$-$q$-Laplacians

I.H. Jung and Y.H. Kang
Energy decay for the nonlinear wave equation with a half-linear dissipation in $\mathbb{R}^N$

C. Pideri and P. Seppecher
Asymptotics of a non-planar rod in non-linear elasticity

T.-T. Shieh and P. Sternberg
The onset problem for a thin superconducting loop in a large magnetic field

Y. Huang, N. Su and X. Zhang
Homogenization of degenerate quasilinear parabolic equations with periodic structure

R.L. Frank
On the tunneling effect for magnetic Schrödinger operators in antidot lattices

S. Engelberg and S. Schochet
Nonintegrable perturbations of scalar viscous shock profiles

H. Le Dret and H. Zorgati
Asymptotic modeling of thin curved martensitic films
