Restriction of Stable Rank Two Vector Bundles in Arbitrary Characteristic .......................... 2319
G. Hein

Strongly Bounded Groups and Infinite Powers of Finite Groups .......................... 2337
Y. de Cornulier

A Question on Strongly Clean Rings ................................................................. 2347
W. Chen

Van Der Waerden's Construction of a Splitting Field ........................................... 2351
F. Richman

On Krull and Valuative Dimension of Tensor Products of Algebras ....................... 2357
S. Bouchiba

Elementary and Good Group Gradings of Incidence Algebras over Partially-Ordered Sets with Cross-Cuts .......................................................... 2369
M. R. Jones

Central Sets and Radii of the Zero-Divisor Graphs of Commutative Rings ............. 2389
S. P. Redmond

Relative Projective Modules and Relative Injective Modules ............................... 2403
L. Mao and N. Ding

On Generalized Adequate Transversals ............................................................. 2419
Z. Ronghua and W. Shoufeng

On -Derivation in Banach Algebras ................................................................. 2437
Z. Abdelali

Minimalities and Modules over Dedekind-Like Rings ........................................... 2453
S. L'Innocente, V. Puninskaya, and C. Toffalori

Valuation and Pseudovaluation Subrings of an Integral Domain ........................... 2467
A. Ayache and O. Echi

(Continued on inside back cover)
The Splitting Criterion of Kempf and the Babylonian Tower Theorem
I. Coandă and G. Trautmann .................................................. 2485

On the Associated Primes of Generalized Local Cohomology Modules
A. Mafi ........................................................................ 2489

On Quasi-Regular Torsion-Free Modules
J. S. Paradero-Vilela and A. T. Paras ........................................ 2495

Noncommutative Leibniz-Poisson Algebras
J. M. Casas and T. Datuashvili .............................................. 2507

On Relative Injective Modules and Relative Coherent Rings
L. Mao and N. Ding .............................................................. 2531

The Derivation Algebra and Automorphism Group of the Twisted Heisenberg-Virasoro Algebra
R. Shen and C. Jiang .......................................................... 2547

On the Direct Indecomposability of Infinite Irreducible Coxeter Groups and the Isomorphism Problem of Coxeter Groups
K. Nuida .......................................................................... 2559

Separative Cancellation over Regular Rings
H. Chen ........................................................................ 2597

On Weak Armendariz Rings
Z. Liu and R. Zhao .............................................................. 2607

Ideal Structure of the Kauffman and Related Monoids
K. W. Lau and D. G. FitzGerald .............................................. 2617

A Categorical Approach to Turaev's Hopf Group-Coalgebras
S. Caenepeel and M. De Lombaerde ...................................... 2631

Factorizable Inverse Monoids of Cosets of Subgroups of a Group
J. East ........................................................................ 2659

On Prime Spectrums of Commutative Rings
D. Lu and W. Yu ................................................................. 2667

Buchsbaum Stanley-Reisner Rings and Cohen-Macaulay Covers
N. Terai and K.-l. Yoshida .................................................... 2673

On Galois Comodules
R. Wisbauer ........................................................................ 2683
