CONTENTS

Inference

Estimating Scale and Truncation Parameters for the Truncated Exponential Distribution with Type-I Censored Sampling .......................... 1
S. Blumenthal and R. C. Dahiya

On Some One-Parameter Families Where Maximal Invariants Do Not Distinguish Hypothesized Models ................................. 23
N. Mukhopadhyay

Estimating Population Size in Logistic Capture-Recapture Models with a Known Sex Ratio ......................................................... 37
L. Zhang, L. Liu, and N. You

Step Contrasts for Identifying the Minimum Effective Dose ...................... 45
S.-L. Jan

Semiparametric Density Estimators Using Copulas ................................ 59
E. Liebscher

Inference for the Scaled Half-Logistic Distribution Based on Progressively Type-II Censored Samples ............................................. 73
N. Balakrishnan and A. Asgharzadeh

Distribution Theory

Sums, Products, and Ratios of Non-central Beta Variables .................... 89
S. Nadarajah

Design of Experiments

Inference for Variance Components in a Mixed Model for Unbalanced Split Plot Design ................................................................. 101
B. Güven

An Alternative Method for Estimating the Variance Components in a Replicated Crossover Study ..................................................... 113
G. Jiang and J. Wu

(Continued on inside back cover)
Some Methods of Constructing Generalized Group Divisible Designs with Two Groups ................................................. 127
S. K. Srivastav and A. Shankar

Multivariate Analysis

Robust Reduced Rank Mixture Discriminant Analysis ......................... 135
S. Bashir and E. M. Carter

Robust Inference for the Correlation Coefficient—
A Parametric Method .............................................................. 147
T.-S. Tsou

Time Series Analysis

Nonstationary Data Analysis by Time Deformation .............................. 163
H. L. Gray, C.-P. C. Vijverberg, and W. A. Woodward

Probabilistic Properties of a Nonlinear ARMA Process
with Markov Switching .............................................................. 193
O. Lee

Statistical Quality Control

Bayesian and Shrinkage Estimation of Process Capability
Index $C_p$ ............................................................................. 205
H. P. Singh and S. Saxena

On Statistical Design of the $S^2$ Control Chart ................................ 229
L. Zhang, M. S. Bebbington, C. D. Lai, and K. Govindaraju
