CONTENTS

DISTRIBUTION THEORY

New Families of Copulas Based on Periodic Functions. .................................. 1437
A. Alfonso and D. Brigo

Strong Approximation of Quantile Function for Strong Mixing and
Censored Processes. ................................................................. 1449
E. Ould-Said and O. Sadki

INFERENCE

On Two Forms of Fisher's Measure of Information. ................................. 1461
T. Papaioannou and K. Ferentinos

Consistency of Maximum Likelihood Estimators in Finite Mixture
Models of the Union of $W$-type Families. ................................... 1471
N. Atienza, J. Garcia-Heras, and J. Munoz-Pichardo

Characterization of Ridge Trace Behavior. ........................................... 1487
R. Zhang and G. C. McDonald

Order-preserving Estimators and an Inequality on the Integration of
Zonal Polynomial. ................................................................. 1503
Y. Sheena

Inference on the Common Variance of Correlated Normal
Random Variables. ................................................................. 1517
D. J. Ghezzi and S. Zacks

SAMPLING THEORY

A Variance Estimator for Systematic Sampling from a Deliberately
Ordered Population. ............................................................... 1533
Y. G. Berger

A Conditionally Unbiased Estimator for the Equal-Catchability
Model. ................................................................. 1543
I. B. J. Goudie and J. Ashbridge

(Continued on inside back cover)
RANKING AND SELECTION METHODOLOGY

A Subset Selection Procedure for Selecting the Exponential Population Having the Longest Mean Lifetime When the Guarantee Times are the Same. ........................................... 1555
N. Misra, S. Kumar, E. C. van der Meulen, and Y. M. Tripathi

DESIGN OF EXPERIMENTS

Constructions of Nested Pairwise Efficiency and Variance Balanced Designs ........................................... 1571
S. Kageyama, S. Rudra, and S. Banerjee

Optimal Designs for Best Linear Unbiased Prediction in Diallel Crosses ........................................... 1579
H. Ghosh and A. Das

TIME SERIES ANALYSIS

On Efficient AR Spectral Estimation for Long-Range Predictions ........................................... 1587
A. Karagrigoriou and F. Vonta

NONPARAMETRIC INFERENCE

Some Results on Nonparametric Calibration ........................................... 1605
P. Misquitta and F. H. Ruymgaart

Rank Test of Location Optimal for Hyperbolic Secant Distribution ........................................... 1617
O. Y. Kravchuk

SEQUENTIAL INFERENCE

Sequential Comparison of Two Treatments Using Weighted Wald-Type Statistics ........................................... 1631
A. Hussein

RELIABILITY ANALYSIS

Reliability of a Stress-Strength Model with Burr Type III Distributions ........................................... 1643
N. A. Mokhlis

SURVIVAL ANALYSIS

Smoothing Techniques for the Bivariate Kaplan-Meier Estimator ........................................... 1659
W. Bae, H. Choi, B. U. Park, and C. Kim

Nonparametric Bivariate Estimation with Left-Truncated and Right-Censored Data ........................................... 1675
P.-S. Shen

Erratum ........................................... 1687
