Theory and Methods

Volume 35, Number 4, 2006

CONTENTS

INFERENCE

Confidence Intervals for the Median of a Finite Population Based on the Sign Test .................................................. 551
S. R. Dubnicka

Estimation of Generalized Variance Under an Asymmetric Loss Function "Squared Log Error" .................. 571
N. S. Farsipour and H. Zakerzadeh

A Simple Method to Study Sensitivity of BMP's ................................. 583
E. Gómez-Déniz, E. Calderin-Ojeda, and I. Cabrera-Ortega

The Non Dominated Set in Bayesian Decision Problems with Convex Loss Functions .................................. 593
J. P. Arias-Nicolas, J. Martin, and A. Sudrez-Llorens

SURVIVAL ANALYSIS

Edgeworth Expansion and Bootstrap Approximation for Studentized Product-Limit Estimator with Truncated and Censored Data .................. 609
Q. Wang and B.-Y. Jing

Empirical Likelihood in a Semi-Parametric Model for Missing Response Data ........................................ 625
L. Wang and N. Veraverbeke

Nonparametric Growth Curve Model with Local Linear Approximation .................................................. 641
K. Satoh and M. Ohtaki

MULTIVARIATE ANALYSIS

On the Construction of Families of Absolutely Continuous Copulas with Given Restrictions .......................... 649
A. Erdely and J. M. González-Barrios

Testing the Equality of Multivariate Distributions Using the Bootstrap and Integrated Empirical Processes ......................................... 661
P. Jing and J. Wang
TIME SERIES ANALYSIS

Asymptotic Results for Spatial ARMA Models. ........................................ 671
A. Illig and B. Truong-Van

CHANGE POINT ANALYSIS AND APPLICATIONS

Bayesian Estimation of the Number of Change Points in Simple Linear Regression Models. .................................................. 689
T.-H. Fan, K.-C. Chang, and C.-B. Lee

Guaranteed Local Maximum Likelihood Detection of a Change Point in Nonparametric Logistic Regression ............................. 711
A. Vexler and G. Gurevich

Detecting Abrupt Leaks in Blended Underground Storage Tanks ............. 727
R. S. Gill, J. P. Keating, and M. I. Baron

STATISTICAL QUALITY CONTROL

Distribution-Free Quality Control Charts Based on Signed-Rank-Like Statistics ........... 743
S. T. Bakir

Volume 35, No. 5, 2006

DISTRIBUTION THEORY

On the Characterization of a Bivariate Geometric Distribution .................. 759
S. K. Dhar and S. Balaji

INFERENCE

Efficient Estimation of Parameters of the Negative Binomial Distribution ................................................ 767
V. Savani and A. A. Zhigljavsky

Statistical Inference for the Generalized Pareto Distribution: Maximum Likelihood Revisited .............................. 785
A. Chaouche and J.-N. Bacro

Estimators for the Finite Mixture of Rayleigh Model Based on Progressively Censored Data ...................... 803
A. A. Soliman

More on Shortest and Equal Tails Confidence Intervals ......................... 821
K. K. Ferentinos and K. X. Karakostas
Multiplicative Algorithms for Maximum Penalized Likelihood Inversion with Non Negative Constraints and Generalized Error Distributions. 831

J. Ma

DESIGN OF EXPERIMENTS

A Note on the Lower Bounds on Maximum Number of Clear Two-Factor Interactions for $2^{m-p}_{III}$ and $2^{m-p}_{IV}$ Designs. 849

G.-J. Yang and M.-Q. Liu

TIME SERIES ANALYSIS

Estimating Mark Functions Through Spectral Analysis for Marked Point Patterns. 861

F. Saura and J. Mateu

CHANGE POINT ANALYSIS

Nonparametric AMOC Changepoint Tests for Stochastically Ordered Alternatives. 887

G. Gurevich

SURVIVAL ANALYSIS

Comparing Nonparametric Estimators for Length-Biased Data. 905

J. de Uña-Álvarez and A. Rodriguez-Casal

QUALITY OF LIFE ANALYSIS

Goodness of Fit Test and Latent Distribution Estimation in the Mixed Rasch Model. 921

G. Martynov and M. Mesbah

LINEAR MODELS

Bartlett Adjustments for Overdispersed Generalized Linear Models. 937

G. M. Cordeiro, A. H. M. A. Cysneiros, and F. J. A. Cysneiros

Volume 35, No. 6, 2006

DISTRIBUTION THEORY

On the Intervened Generalized Poisson Distribution. 953

D. P. M. Scollnik
On the Ratio of Two Folded Normal Distributions .......................... 965
H.-J. Kim

Stochastic Comparisons and Dependence of Spacings from Two Samples of Exponential Random Variables ......................... 979
T. Hu, F. Wang, and Z. Zhu

ORDERED DATA AND APPLICATIONS

A Note on the Distribution of Linear Functions of Two Ordered Correlated Normal Random Variables .......................... 989
A. I. Genc

Properties of Entropies of Record Values in Reliability and Life Testing Context .................................................. 997
H. Zahedi and M. Shakil

INFESSION

Linear Prediction Sufficiency for New Observations in the General Gauss-Markov Model ........................................... 1011
J. Isotalo and S. Puntanen

Inference for the Mean Residual Life Function via Empirical Likelihood .......................................................... 1025
Y. Zhao and G. Qin

From Ordinary to Shrinkage Square-Root Estimators .................. 1037
S. Saxena and H. P. Singh

NONPARAMETRIC INFERENCE

Concordance of Complete or Right-Censored Rankings Based on Spearman's Footrule ........................................... 1059
D. Quade and I. A. Salama

Bivariate Sign Test for One-Sample Bivariate Location Model Using Ranked Set Sample ........................................ 1071
H. M. Samawi, M. F. Al-Saleh, and O. Al-Saidy

REGRESSION ANALYSIS

D-optimal Designs for a Combined Simple Linear and Haar-Wavelet Regression Model ........................................ 1085
Y. Tian and A. M. Herzberg

Integrated Estimation of Functional-Coefficient Regression Models with Different Smoothing Variables .................. 1093
R. Zhang and G. Li

Smoothing Splines with Boundary Correction .......................... 1101
C. Huang
MULTIVARIATE ANALYSIS

Efficiency of t-Test and Hotelling's $T^2$-Test After Box-Cox Transformation. ................................................................. 1109
J. Freeman and R. Modarres

The Multivariate Split Normal Distribution and Asymmetric Principal Components Analysis. ........................................ 1123
M. Villani and R. Larsson

GOODNESS-OF-FIT TESTS

An Adaptive Goodness-of-Fit Tests. ................................................................. 1141
A. Grane and J. Fortiana

Erratum ........................................................................................................... 1157
