How Many Observations Fall in a Neighborhood of an Order Statistic? ................................. 851
A. Dembinska, A. Stepanov, and J. Wesotowski

Asymptotic Normality of Extreme Quantile Estimators Based on the Peaks-Over-Threshold Approach ........................................ 869
J. Diebolt, A. Guillou, and P. Ribereau

INFERENC E

On a Test of the Difference Between Two Binomial Proportions. ................. 887
Y. Parmet and E. Schechtman

Testing Equality of Order Constrained Inverse Gaussian Means. ................. 897
L. Tian and G. S. Mudholkar

BAYESIAN INFERENCE

Bayesian Estimation of Stochastic Frontier Models with Multivariate Skew $t$ Error Terms ............................................................... 907
S. Tchumtchoua and D. K. Dey

The Superiorities of Bayes Linear Minimum Risk Estimation in Linear Model ................................................................. 917
L. Wei and W. Zhang

NONPARAMETRIC INFERENCE

A Note on the Variances of the Tests of Kendall, Jonckheere, and Terpstra ................................................................. 927
E. Letón and P. Zuluaga

REGRESSION ANALYSIS AND LINEAR MODELS

Constructive Cross-Validation in Linear Prediction ........................................ 939
D. J. Spitzner

Consistent Estimation of the Regression Coefficient Through Weighted Arithmetic Mean of the Inconsistent Estimators in Replicated Ultrastructural Model ........................................ 955
Shalabh and P.-H. Liau

Admissible Linear Estimators with Respect to Inequality Constraints .............. 961
C.-Y. Lu, J.-H. Wu, and B.-Y. Zhang
TIME SERIES ANALYSIS AND APPLICATIONS

Spurious Regressions with Time-Series Data:
Further Asymptotic Results ........................................... 967
D. E. A. Giles

Finite Sample Modifications of the Granger Non Causality Test
in Cointegrated Vector Autoregressions ............................ 981
H. Chigira and T. Yamamoto

Sample Entropy Statistics and Testing for Order in Complex
Physiological Signals .................................................. 1005
J. S. Richman

MULTIVARIATE ANALYSIS

Estimation of Sib-Sib Correlation via a Kotz-Type Density Function ........................................... 1021
A. Helu and D. N. Naik

QUALITY CONTROL

Control Charts for the Generalized Variance Based
on Its Predictive Distribution ......................................... 1031
U. Menzefricke

SAMPLING THEORY

Inverse Sampling with Unequal Selection Probabilities .................................................. 1039
L. Greco and S. Naddeo

Volume 36, No. 6, 2007

DISTRIBUTIONS AND APPLICATIONS

Characterization Problems Related to the Shepp Property ............................................. 1049
G. G. Hamedani, H. Volkmer, and J. Wesotowski

Analysis of Experimental Poisson Data ................................ 1059
P. C. Wang

INFEERENCE

Estimation for Location-Scale Models with Censored Data ........................................... 1069
X. Lu, R. S. Singh, and A. F. Desmond

M-Estimators Based on Inverse Probability Weighted Estimating
Equations with Response Missing at Random ........................ 1091
Q. Wang

Exponential-Bound Property of Estimators and Variable
Selection in Generalized Additive Models .......................... 1105
X. Wang and K. C. Carriere
BAYESIAN INFERENCE

Reconciling Bayesian and Frequentist Evidence in the One-Sided Scale Parameter Testing Problem .................................................. 1123
A. C. Micheas and D. K. Dey

Bayes Estimation of Shift Point in Geometric Sequence ........................................ 1139
J. B. Shah and M. N. Patel

NONPARAMETRIC INFERENCE

Testing Treatment-Covariate Interaction in a Nonparametric Analysis of Covariance Model .................................................. 1153
W. Chen and A. Bathke

Nonparametric Estimation of Average Growth Curve with General Nonstationary Error Process ........................................ 1173
K. Benhenni and M. Rachdi

DESIGN OF EXPERIMENTS

Efficient Block Designs for Dependent Observations—A Computer-Aided Search .................................................. 1187
S. K. Satpati, R. Parsad, and V. K. Gupta

Minimax Design for the Difference Between Estimated Responses for the Quadratic Model Over Hypercubic Regions .......................... 1225
S. Huda

ECONOMETRIC METHODS

The Estimation and Inference of a Panel Cointegration Model with a Time Trend .................................................. 1233
M.-H. Chiang, C. Kao, and C.-H. Lo

RELIABILITY ANALYSIS

Adaptive Sequential Preventive Maintenance Policy and Bayesian Consideration .................................................. 1251
H. S. Kim, Y. S. Kwon, and D. H. Park
Preface .................................................................................................................. 1271

Are the Order Statistics Ordered? A Survey of Recent Results. ...................... 1273
J. Navarro, T. Rychlik, and M. Shaked

On the Influence of Record Terms in the Addition of Independent Random Variables. ................................................................. 1291
I. Akhundov, A. Berred, and V. B. Nevzorov

Exact Distributions of the Number of \( r \)-Records and the \( r \)-Record and Inter-\( r \)-Record Times ................................................................. 1305
Ch. A. Charalambides

On Characterization of Distributions Through the Properties of Conditional Expectations of Order Statistics. ................................. 1319
I. Bairamov and T. Özkal

The Probability Distribution for the Number of Successes in Independent Trials. ................................................................. 1327
P. J. Boland

Generalized Pareto Distributions Characterized by Generalized Order Statistics ................................................................. 1333
M. Tavangar and M. Asadi

Projection Bounds on Expectations of Spacings of Generalized Order Statistics from DD and DDA Families. ................................. 1343
M. Bieniek

Estimation for the Parameters of the Pareto Distribution Under Progressive Censoring ................................................................. 1359
C. Kus and M. F. Kaya

Inequalities for Expected Current Record Statistics ........................................ 1367
M. Z. Raqab

A Review on Characterizations of Discrete Distributions Based on Records and \( k \)th Records ................................................................. 1381
A. Dembinska

Runs in a Bivariate Sequence Over the First Coordinate ................................ 1389
S. Eryilmaz and M. Bekçi

Comparison of Records and Maxima ................................................................. 1397
A. Impert and T. Rychlik
Order Statistics from the Generalized Exponential Distribution and Applications ........................................... 1409
K. S. Sultan

Optimality Criteria and Optimal Schemes in Progressive Censoring .................. 1419
M. Burkschat, E. Cramer, and U. Kamps

On the Similarity Structure of Order Statistics .................................................. 1433
M. F. Al-Saleh

Stochastic Orderings of Order Statistics of Independent Random Variables with Different Scale Parameters .......................................................... 1441
B.-E. Khaledi and S. Kochar

Best Bounds of \( k \)th Records from Bounded Samples ............................................. 1451
M. Klimczak

Identification of Product Measures by Random Choice of Marginals .................. 1465
M. Konwerska, F. López-Blázquez, and J. Wesolowski

On Distributions of Exceedances Based on Generalized Order Statistics ............ 1479
I. Bairamov and H. Tanil

Volume 36, No. 8, 2007

DISTRIBUTIONS, MODELS, AND APPLICATIONS

Distributions with Generalized Skewed Conditionals and Mixtures of Such Distributions .......................................................... 1493
B. C. Arnold, E. Castillo, and J. M. Sarabia

Comments on "Sums, Products, and Ratios of Non-Central Beta Variables" by Saralees Nadarajah ................................. 1505
A. M. F. L Miranda de Sa, L. B. Felix, and E. M. A. M. Mendes

ORDERED DATA ANALYSIS

Likelihood Ratio Order of \( m \)-Spacings in Multiple-Outlier Models ................. 1507
M. Xu, X. Li, P. Zhao, and Z. Li

BAYESIAN INFERENCE

Constrained Bayes and Empirical Bayes Estimation with Balanced Loss Functions .................................................. 1527
M. Ghosh, M. J. Kim, and D. Kim

Empirical Bayes Testing for Double Exponential Distributions .......................... 1543
T. Liang

Detection and Localization in Test Accuracy: A Bayesian Perspective ................ 1555
L. D. Broemeling

Bayes Prediction for a Heteroscedastic Regression Superpopulation Model Using Balanced Loss Function ........................................... 1565
A. K. Bansal and P. Aggarwal
NONPARAMETRIC INFERENCES

Estimation of the Entropy Functional from Dependent Samples. J. him

REGRESSION ANALYSIS

Extending Save and PHD. J. Zhao, X. Xu, and J. Ma

MULTIVARIATE ANALYSIS

A Note on Sample Size Determination for the Estimation of the Mean Vector of a Multivariate Population. W. Cui and F. Zhu

SURVIVAL ANALYSIS

A Class of Two-Sample Nonparametric Tests for Panel Count Data. D.-H. Park, J. Sun, and X. Zhao

Proportional Hazards Model for Multivariate Failure Time Data. P. G. Sankaran and V. N. Sreeja

CLINICAL TRIALS

Statistical Inference of Adaptive Designs with Binary Responses. Y. Yi and X. Wang

Erratum
