CONTENTS

Bermudez, M. et Hector, G. Laminations hyperfinies et revetements 305
Cheung, Y. and Masur, H. Minimal non-ergodic directions on genus-2 translation surfaces 341
Comerford, M. Hyperbolic non-autonomous Julia sets 353
Felmer, P., Martínez, S. and Tanaka, K. High-frequency chaotic solutions for a slowly varying dynamical system 379
Flaminio, L. and Forni, G. Equidistribution of nilflows and applications to theta sums 409
Hulse, P. Correction to 'A class of unique g-measures' 435
Hulse, P. An example of non-unique g-measures 439
Jager, T. H. and Keller, G. The Denjoy type of argument for quasiperiodically forced circle diffeomorphisms 447
Matui, H. Affability of equivalence relations arising from two-dimensional substitution tilings 467
Puig, J. and Simó, C. Analytic families of reducible linear quasi-periodic differential equations 481
Rippon, P. J. and Stallard, G. M. Dimensions of Julia sets of meromorphic functions with finitely many poles 525
Salazar, J. M. Instability property of homeomorphisms on surfaces 539
Schraudner, M. On the algebraic properties of the automorphism groups of countable-state Markov shifts 551
Voutaz, E. Hyperbolicity of the renormalization operator for critical $C^r$ circle mappings 585

Papers to appear in forthcoming issues 619
