Journal of Industrial and Management Optimization

Volume 2  Number 2  May 2006

CONTENTS

Jiongmin Yong, Remarks on some short rate term structure models ........................................... 119
Ka Wo Lau and Yue Kuen Kwok, Optimal execution strategy of liquidation ...... 135
Lin Xu and Rongming Wang, Upper bounds for ruin probabilities in an autoregressive risk model with a Markov chain interest rate .......................................................... 165
Tak Kuen Siu, Howell Tong and Hailiang Yang, Option pricing under threshold autoregressive models by threshold Esscher transform ...................................................... 177
Lixin Wu and Fan Zhang, LIBOR market model with stochastic volatility .... 199
Yinghui Dong and Guojing Wang, Ruin probability for renewal risk model with negative risk sums ..................................................................................................................... 229
