CONTENTS

CONTRIBUTED PAPERS

Hybrid Approach with Active Set Identification for Mathematical Programs with Complementarity Constraints, G. H. Lin and M. Fukushima .............................................. 1

Optimization Approach to the Estimation and Control of Lyapunov Exponents, P. M. Pardalos and V. A. Yatsenko .................................................. 29

Perturbation Approach to Sensitivity Analysis in Mathematical Programming, E. Castillo, A. J. Conejo, C. Castillo, R. Minguez, and D. Ortigosa .............................................. 49

Zero-Sum Differential Games Involving Hybrid Controls, S. Dharmatti and M. Ramaswamy .............................................................. 75

Well-Posedness and L-Well-Posedness for Quasivariational Inequalities, M. B. Lignola .............................................................. 119

Optimal State Estimation in Networked Systems with Asynchronous Communication Channels and Switched Sensors, A. S. Matveev and A. V. Savkin .............................................. 139

Approximate Subgradient Methods for Nonlinearly Constrained Network Flow Problems, E. Mijangos .............................................. 167

Weak Convergence Theorem by an Extragradient Method for Nonexpansive Mappings and Monotone Mappings, N. Nadezhkina and W. Takahashi .............................................. 191

On Coincidence of Feedback Nash Equilibria and Stackelberg Equilibria in Economic Applications of Differential Games, S. J. Rubio .............................................. 203

Stochastic Programming with Equilibrium Constraints, A. Shapiro . 223

GENERAL INFORMATION

Editorial Policy .............................................................. 245
Preparation of Papers .............................................................. 247
Editorial Addresses .............................................................. 251
