Katsunori Kawamura
Branching Laws for Polynomial Endomorphisms of Cuntz Algebras Arising from Permutations 111-126

N. Crampé
New Spin Generalisation for Long Range Interaction Models 127-137

Konstantin Pankrashkin
Spectra of Schrödinger Operators on Equilateral Quantum Graphs 139-154

Akihito Wachi
Central Elements in the Universal Enveloping Algebras for the Split Realization of the Orthogonal Lie Algebras 155-168

Takashi Yamamoto
Higher Order Macdonald Operators with Stability Properties and Their Applications 169-181

Antonio N. Bernal, Miguel Sánchez
Further Results on the Smoothability of Cauchy Hypersurfaces and Cauchy Time Functions 183-197

Pavol Ševera
Poisson Actions up to Homotopy and their Quantization 199-208

Andreas Aste
Dispersive Calculation of the Massless Multi-loop Sunrise Diagram 209-218

Pavel Exner, Evans M. Harrell, Michael Loss
