# TABLE OF CONTENTS

The Use of Cubic B-Spline Scaling Functions for Solving the One-dimensional Hyperbolic Equation with a Nonlocal Conservation Condition ........................................ 1277  
*Mehdi Dehghan and Mehrdad Lakestani*  
Published online 12 February 2007

Parameter Uniform Approximations for Time-Dependent Reaction-Diffusion Problems ........................................................................................................... 1290  
*Torsten Linß and Niall Madden*  
Published online 2 March 2007

Performance and Numerical Behavior of the Second-Order Scheme of Precise Time-Step Integration for Transient Dynamic Analysis ........................................ 1301  
*Hang Ma, Feng Yin, and Qing-Hua Qin*  
Published online 2 March 2007

Implicit-Explicit Multistep Characteristic Finite Element Methods for Nonlinear Convection-Diffusion Equations ...................................................... 1321  
*Xiaohan Long and Chuanjun Chen*  
Published online 2 March 2007

An Eulerian-Lagrangian Discontinuous Galerkin Method for Transient Advection-Diffusion Equations ................................................................. 1343  
*Kaixin Wang, Hong Wang, and Mohamed Al-Lawatia*  
Published online 2 March 2007

Effect of Numerical Integration in the DGFEM for Nonlinear Convection-Diffusion Problems .......................................................................................... 1368  
*Veronika Sobotkova and Miloslav Feistauer*  
Published online 2 March 2007

Incremental Unknowns Preconditioning for Solving the Helmholtz Equation ............................................................... 1396  
*Pascal Poulet and Amir Boag*  
Published online 2 March 2007
