CONTENTS

A new construction of Ewell's octuple product identity by Sin-Da Chen, and Wei-Yueh Chen Sen-Shan Huang .......................... 1241

Fixed point index and solutions of differential equations in Banach spaces by Zhi-Qin Han ...................................................... 1255

Periodic boundary value problems for impulsive differential-difference equations by Jianli Li and Jianhua Shen .................. 1265

On standard ideals in weighted convolution algebras on subsemigroups of \( \mathbb{R}^+ \) by H. V. Dedania .............................................. 1279

Two properties of semistrictly preinvex functions by X. M. Yang, X. Q. Yang and K. L. Teo .................................................. 1285

Periodic solutions of delay differential equations with piecewise continuous arguments by Genqiang Wang and Jurang Yan ........ 1293
