CONTENTS

Differential equations for Hilbert modular forms of $\mathbb{Q} (\sqrt{2})$
By Toshiyuki Mano ................................................................. 457

Fundamental groups of spaces of holomorphic maps and group actions
By Kohheï Yamaguchi ............................................................... 479

Spectra of deranged Cantor set by weak local dimensions
By In-Soo Baek ........................................................................ 493

Regularities of local times of two-parameter martingales
By Jicheng Liu and Jiagang Ren .................................................. 501

On characterizations of general helices for ruled surfaces in the pseudo-Galilean space $G^2_1$-(Part-I)
By Mehmet Bektaş ................................................................. 523

Nodal curves and Riccati solutions of Painlevé equations
By Masa-Hiko Saito and Hitomi Terajima .................................. 529

The 5-primary homotopy exponent of the exceptional Lie group $E_8$
By Stephen D. Theriault ........................................................... 569

Rational equivalence and Phantom map out of a loop space, II
By Kouyemon Iriye ................................................................... 595

On invariants of curves in centro-affine geometry
By Ömer Pekşen and Djavvat Khadjiev ...................................... 603

On the integrated density of states of random Pauli Hamiltonians
By Naomasa Ueki ...................................................................... 615

On $\{X, U(n) \}$ when $\text{dim} \ X$ is $2n + 1$
By Hiroaki Hamanaka .............................................................. 655

KO-theory of complex Stiefel manifolds
By Daisuke Kishimoto .............................................................. 669

Homotopy genus of $BU$ and the Bott map
By Daisuke Kishimoto .............................................................. 675

On the Stiefel-Whitney classes of the adjoint representation of $E_8$
By Akihiro Ohsita ................................................................. 679

Printed by Tosyo Insatsu Dōhōsyा
