SOMMAIRE

M.K. AOUF and B.A. AL-AMRI, On certain subclass of prestarlike functions defined by Salagean operator ................................................. 3
FARIT G. AVKHADIEV and KARL J. WIRTHS, On a conjecture of Livingston .................................................................................... 19
AURELIAN CERNEA, Local existence of solutions to a class of nonconvex second order differential inclusions ...................... 25
XIAOLI CHAO, Morse index of harmonic maps into $H^n$ .................. 33
LJUBOMIR B. ĆIRIĆ and JEONG S. UME, Multi-valued mappings on metric spaces ................................................................. 41
IULIU CRIVEI, Generalized R.D-pure-injectivity and $RD$-flatness .... 47
PAULA CURT, Quasiconformal extensions of holomorphic maps in $C^n$ 55
VERONICA ANA DÂRZU, Data dependence for functional differential equations of mixed types ...................................................... 61
ALEXANDR DEMENCHUK, Irregular forced almost periodic solutions of ordinary linear differential systems ............................. 67
UĞUR S. KIRMACI and M. EMİN ÖZDEMIİR, On the modular integrals 75
LUMINITA LEMNETE NINULESCU and OCTAV OLTEANU, Extension of linear operators, distanced convex sets and the moment problem ................................................................. 81
S.M. MAZHAR, $|N,p|_k$ summability of Fourier series and its conjugate series ................................................................. 89
VERONICA NECHITA, Theory of superordinations for several complex variables ................................................................. 97
NICOLAE N. PASCU and DORINA RĂDUCANU, On some properties of univalent functions in the upper half plane .................. 101
VALERIU POPA and TAKASHI NOIRI, Some properties of weakly quasicontinuous functions in bitopological spaces ........... 105
