SURVEY and REVIEW
Introduction
Combinatorial Landscapes, Christian M. Reidys and Peter F. Stadler 3

PROBLEMS and TECHNIQUES
Introduction 55
Convergence, Oscillations, and Chaos in a Discrete Model of Combat, Hassan Sedaghat 74

SIGEST
Introduction 93

EDUCATION
Introduction 109
Inverting Gravitational Lenses, Peter R. Newbury and Raymond J. Spiteri 111

BOOK REVIEWS
Introduction 131
ACTA Numerica:A Featured Review of Its First Ten Years, Andrew Stuart 133
Continuum Mechanics and Theory of Materials (P. Haupt), Stuart S.Antmon 135
Stability and Transition in Shear Flows (Peter J. Schmid and Dan S. Henningson), Peter Btossey 136
Geometric Partial Differential Equations and Image Analysis (Guillermo Sapiro), Dowd Chopp 141
Mathematical Modeling in Continuum Mechanics (FLTemam and A. Miranville). Donald A. Drew 142
Multigrid (U.Trottenbei-g, C. Oosterlee, and A. Schuller), feter W. Hemker 145
Limit Theorems of Probability Theory (Yu.V. Prokhorov andV. Statulevicius, editors), Christopher C. Heyde 146
Turbulent Combustion (Norbert Peters), Thomas L Jackson 147
Geometric Approaches to Differential Equations (Peter j.Vassiliou and Ian G. Lisle, editors), Nallnjoshi 148
An Introduction to Turbulent Flow (jean Mathieu and Julian Scott), Anthony Leonard 151
Partial Differential Equations in Mechanics, Parts 1 and 2 (A. P.S. Selvadurai), Harold Levine 151
Stochastic Modeling of AIDS Epidemiology and HIV Pathogenesis (Wai-Yuan Tan), Patrick W. Nelson 153
An Introduction to Complex Analysis (0. Carruth McGehee), Robert £ O'Malley 154
Nonlinear Physical Oceanography: A Dynamical Systems Approach to the Large Scale Ocean Circulation and El Nino (Henk A. Dijkstra), Wendy Welch Oriando 155
CONTINUED FROM BACK COVER

Hyperbolic Systems of Conservation Laws: The One-Dimensional Cauchy Problem (Alberto Bressan), Joel Smaller 156
Turbulence Structure and Vortex Dynamics (J. C. R. Hunt and J. C. Vassilicos, editors), Philippe Spolort 158
Numerical Mathematics (A. Quarteroni, R. Sacco, and F. Saleri), John Strikwerda 160
Fundamentals of Computational Fluid Dynamics (Patrick J. Roache), Lutz Tbbisica 162
Multichannel Optical Networks (Peng-Jun Wan), Gordon T Wilfong 164
Random Graphs (Svante Janson, Tomasz Luczak, and Andrzej Rucinski), Nick Wormald 165
