VICTOR P. SNAITH: The weight-two motivic complex of equicharacteristic local fields .......................................................... 1185

FRANCISCO GONZÁLEZ-ACUÑA and ARTURO RAMÍREZ: Epimorphisms of knot groups onto free products .................................................. 1205

NORBERT A’CAMPO: Monodromy of real isolated singularities ........ 1229

MURRAY ELDER, JON MCCAMMOND and JOHN MEIER: Combinatorial conditions that imply word-hyperbolicity for 3-manifolds .............. 1241

MARTIN BENDESKY and DONALD M. DAVIS: A stable approach to an unstable homotopy spectral sequence ........................................... 1261
CONTENTS (continued from outside front cover)

T.R. RILEY: Higher connectedness of asymptotic cones ........................................ 1289

BJØRN JAHREN and SŁAWOMIR KWASIK: Three-dimensional surgery theory, UNil-groups and the Borel conjecture ......................................................... 1353

VLADIMIR S. MATVEEV: Three-dimensional manifolds having metrics with the same geodesics .............................................................. 1371

TETSU NISHIMOTO, HIROO SHIGA and TOSHIHIRO YAMAGUCHI: Elliptic rational spaces whose cohomologies and homotopies are isomorphic. 1397

NGUYEN TIEN ZUNG: Levi decomposition of analytic Poisson structures and Lie algebroids ................................................................. 1403

Volume Contents and Author Index Vol 42 (2003) ............................................. 1
